PROFILE

Backend developer with strong foundations in Java, Data Structures & Algorithms, and Node.js backend development. Experienced in building REST APIs, implementing authentication systems, and deploying applications using Docker and CI/CD pipelines.

EDUCATION

Vivekanand College for Advanced Computer & Information Science
Bachelor of Computer Application

Surat, GJ
2023 – present

SKILLS

Programming Languages: Java, Javascript

Problem Solving: Data Structures & Algorithms (Java)

Backend Development: Node.js, Express.js, REST APIs, JWT Authentication, RBAC

Frontend(Basic): React.js, [Next.js](#)

Database: MongoDB

DevOps & Deployment: Docker, CI/CD (GitHub Actions), Prometheus, Render, Railway

Tools: Git, GitHub, Postman

EXPERIENCE

Malavia Hospital

Surat, GJ

IT Intern

11/12/2025 – 19/01/2026

- Set up and containerized a Node.js backend using Docker with proper environment configuration.
- Developed and optimized REST APIs for hospital staff modules using Express.js and MongoDB.
- Implemented role-based access control (RBAC) and developed APIs for handling operational hospital data securely.
- Built a Python-based PDF automation tool to streamline document workflows.
- Conducted controlled cybersecurity research in a virtual machine environment.

PROJECTS

HMS Backend

11/2025 – present

- Developed a Hospital Management System backend with RBAC, billing, and secure authentication using Node.js and MongoDB.
- Integrated Razorpay payment gateway and deployed the backend using Docker with automated CI/CD pipelines.

DarkMatter

01/26 to 02/26

- Developed a malware behavior simulation in a controlled lab environment to analyze attack propagation patterns.

SnapIt

09/25 to 10/25

- Developed a full-stack e-commerce application with user authentication and role-based access.
- Implemented product management, cart functionality, order processing, and admin controls.

FilmCraft

10/24 to 03/25

- Designed and implemented the UI of a desktop video editing application using C++, Qt, and QML.
