

Rohit More

Full Stack Engineer | React • Node.js • TypeScript • AWS | Building Production Healthcare SaaS

+91-9512418859 | rohitmore.dev@gmail.com |  github.com/rohitbytecode

PROFILE

Full Stack Engineer with 2+ years of experience building healthcare SaaS applications using TypeScript, React, Node.js, MongoDB, and AWS. Experienced in building end-to-end web applications, REST APIs, authentication, WebSockets, cloud deployment, and scalable backend systems. Strong foundation in Java and Data Structures & Algorithms.

EDUCATION

Vivekanand College for Advanced Computer & Information Science

Surat, GJ

Bachelor of Computer Application (BCA)

2023 - 2026

SKILLS

Languages: TypeScript, JavaScript, Java

Frontend: React.js, Next.js

Backend: Node.js, Express.js, REST APIs, Socket.IO, JWT Authentication, RBAC

Database: MongoDB, PostgreSQL, Redis, Prisma (ORM)

Cloud & DevOps: AWS EC2, Amazon S3, IAM, Nginx, PM2, Docker, GitHub Actions (CI/CD), Render, Railway

Observability: Prometheus, OpenTelemetry, Pino

Tools: Git, GitHub, Postman, Electron

Problem Solving: Data Structures & Algorithms (Java)

EXPERIENCE

Malavia Hospital

Surat, GJ

Full Stack Engineer

April 2024 – Present

- Developed and maintained a healthcare insurance claims management platform using React, TypeScript, Node.js, Express, and MongoDB.
- Owned the complete software development lifecycle by designing, developing, deploying, and maintaining production software used daily by hospital staff.
- Replaced manual claim processing workflows with a centralized web application, improving operational efficiency and reducing processing time.
- Implemented JWT authentication, RBAC, and WebSocket-based concurrency control to prevent conflicting edits during simultaneous claim processing.
- Deployed and maintained the application on AWS using EC2, IAM, MongoDB Atlas, Nginx, PM2, and HTTPS.
- Integrated Prometheus metrics, OpenTelemetry tracing, and structured logging with Pino to improve monitoring and debugging.
- Built financial settlement workflows supporting discounts, payer contracts, TDS deductions, and hospital/vendor settlements, improving financial traceability and auditability.

ENGINEERING HIGHLIGHTS

- Delivered production healthcare SaaS end-to-end.
- Solved production TLS/HTTPS deployment issues.
- Built Horizon, an open-source reverse proxy & load balancer.

OPEN SOURCE PROJECTS

Horizon - Reverse Proxy & Load Balancer

03/2026 - Present

- Developed a reverse proxy and load balancer in TypeScript with Round-Robin routing, active health checks, automatic failover, and HTTP request forwarding.
- Implemented a monitoring endpoint exposing request throughput, latency, active connections, and backend health for observability.

 github.com/rohitbytecode/Horizon

Hospital Management SaaS

12/2025 – 03/2026

- Built a multi-tenant Hospital Management SaaS backend using TypeScript, Node.js, MongoDB, and scalable REST APIs.
- Implemented retry logic, error handling, and logging for reliable, fault-tolerant performance.
